Incontro Plenario ICSC Spoke 8

Monday, 24 June 2024

WP4 Genome bioinformatics pipelines for GPU-based HPC infrastructures - Fibonacci (14:30 - 16:00)

  -**Conveners: Chiara Romualdi**

time	[id] title	presenter
14:30	[6] sgdGMF: a new scalable matrix factorization framework for high-dimensional omics data	CASTIGLIONE, Cristian
14:55	[7] Dissecting tumor transcriptional heterogeneity using single-cell RNA-seq data	CALOGERO, Raffaele
15:15	[8] Integration of scRNAseq datasets for studying cellular heterogeneity in solid tumors	VOLINIA, Stefano
15:40	[9] Inosinome profiling by high-throughput sequencing	PICARDI, Ernesto
